28 October 2008

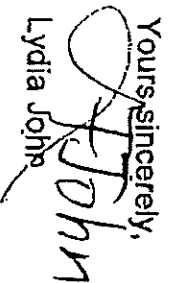

To whom it may concern:

On behalf of FCCVI Inc. we would like to express our deepest appreciation for services extended to our communities which it has at present enhanced, supported and educated our fellow community members into the health industry for the betterment of their employability in the Australian workforce.

The training by a large number of our community members has given them not only an expansion of knowledge and other skills, but it has also entitled and air off confidence in pursuing their careers.

The certificate training deliver (Certificate II in Health and Community Services) broaden their expertise and awareness as to the mandatory standard of service delivery in the health industry and the mode of training was developed and delivered with the high standard, yet in a personalized way. Professionalism was never excluded in the delivery of lectures and support was never unattainable, this mode of training was embraced wholly by the participants and made the training enjoyable, encouraging and unthreatening which despite the in depth theories, participants continued to pursue their goal of completion.

Inclosing, we look forward to continuing our relationship with Consider This Training "CTT" and to continue building and structuring over Filipino Community.

Yours sincerely,

Lydia John

AGED CARE SERVICES, FIRST AID & FOOD HANDLING

Training Course
Sunshine group
Sunny Vale Elementary School

COMMENDATION

It is in the delight of the AGED CARE, FOOD HANDLING, FIRST AID Training Participants, Sunshine Group, who are filled with satisfaction and pride to experience a Trainor, who is able to define the details of course work, seldom attained by other methods of training information, to especially COMMEND the efficiency of effective training dissemination of MS. ANTONIA VENERACION, under the CONSIDER THIS TRAINING (CTT) Services.

The AQTF needs of a Quality dissemination of training courses has been materialized, not just by theoretical range of details but by practical experience sharing, more than enough to learn and to apply later by the trainees, in the fields covered by the studies.

The vibrancy of the three months training, the infusion of such lively interactions, the in-depth sharing of how, what, why, when of the Aged Care services in particular, through her own way of sharing the services, the fun that details the danger and risk of the tasks, which does not scare the trainees for future job, instead, encourages us to apply humanitarian tasks later when employed.

Antonia does not only train us through reading of the handouts, but, SHE DETAILED THE MODULE INTO A BREAKING UP OF GIVING THE BEST OF THE MEANINGS AND THE ACTUAL EXPERIENCE IN THE SERVICES. The Training Participants COMMENDS deeply from their hearts, to let any CARE SERVICE PROVIDER observe and promote, continue to patronise/use Antonia's training ability, not just to participate in the exercise of learning but, to manifest the needs of the Australian Quality Training Framework (AQTF) in qualifying one of the most appropriate training course and the deserving Trainor we could ever have.

Done this 25th Day of October 2008, at Sunny Vale Elementary School, Sunshine Victoria.

Referral Letter

Ms. Vilma Egur
Program Coordinator
Filipino Community Council of Victoria, Inc
93 Cowper Street, Footscray 3011

28 October 2008

To whom it may concern,

This referral letter is on behalf of the Filipino Community of Victoria. We would like to express our appreciation to Consider This Training "CTT" for the opportunity that our community members have been given to experience training in the area of health (Certificate II Health and Community Services).

The training delivered to our members opened new ideas and ambitions which lay dormant due to the un-employability which ranged from lack of education, experience or the minimal command of the English language.

The materials used for the training and also the mode of delivery were developed in such a way that the limitations of the participants no longer existed as they became involved, aware and confident from the amount of knowledge they received.

The other area which "CTT" displayed their awareness and consideration of peoples' situations was to deliver training in areas that were geographically accessible to the trainees wherein this added to their enthusiasm for consistent attendance.

It was exciting to receive feedback from graduates as to how much they enjoyed the training and as to how the training has given them knowledge, confidence and an expanded network not to mention how they are now confident in their level of skills which they have attained will be an integral part in their search for job opportunities and be counted as a valued member of the community.

It is to this that our community and organization would like to further strengthen our relationship with "CTT" and their involvement in the development process and education of our member to ensure their goals and career ventures are met. Apart from the educational contents of this commitment between "CTT" and the Filipino Community we would like to expand the scope in job networking which will support and secure the financial stability of our members. With the support of "CTT" the community members will have a reliable and responsible organization to address their employment concerns so depending on the outcome of "CTT" s submission for the Job Network Funding this will guarantee the applicants the consistency in services already established by "CTT".

We look forward to working with "CTT" in the future and again thank you for your assistance and consideration on behalf of our community and other communities.

Sincerely,

W. Brown
